

Update of Global Marshall Plan initiative in Nigeria.

Greetings from Liberty 4 Africa and all her supporters of this Global Marshall Plan initiative in Nigeria, It is imperative to make mention again that this initiative is the perfect model for the solution to world challenges in the 21st century.

Over the past years of endorsing Global Marshall Plan initiative in Nigeria, we had a been making research on the implementation plan to see that this initiative not only touches the rich or the urban areas but the grassroots and ensuring reduce poverty and unemployment, enhance employability, empower youth to become productive citizens, enable entrepreneurship, stimulate broad-based economic development, and accelerate social transformation.

After the press conference of the launching of Global Marshall Plan Initiative in Nigeria in 2005, we had lots of transition in the launching of the initiative in the National level in Nigeria, but we finally come to a conclusion.

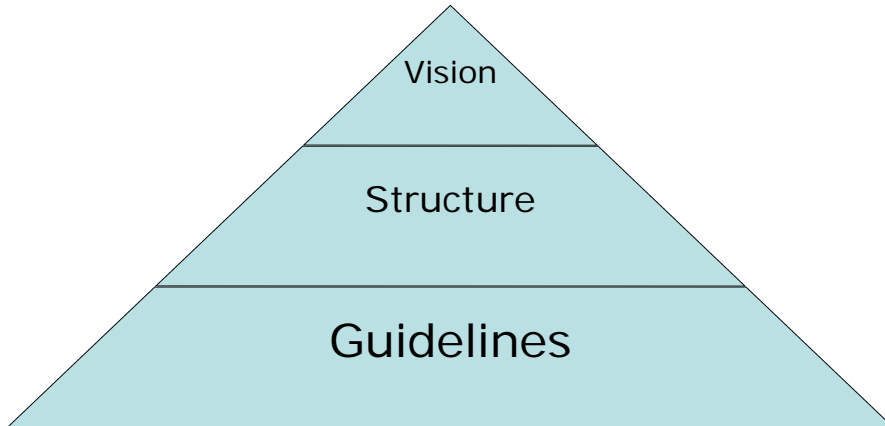

From research one of the challenges the endorsers do deliberate on apart from inadequate funds is how to implement the initiative in their respective places in the country.

It is imperative to know that what will solve the challenges of inadequate funds is the appropriate model for implementation of any project. We realize that having a conference without a proper implementation plan to strengthen the initiative goals in Nigeria and Africa will be waste of donor's money and setback to goals and initiatives.

Liberty 4 Africa research on this implementation plan in Nigeria and as well as Africa has come up with sustainable solution.

Firstly we need to identify the Vision, which will determine the Structure and structure will determine the Guidelines. Below is various chats to illustrate our findings. In the word chat there is a word hat, with this chat- individuals, organizations etc knowing what hat to put on and then enjoying the success and challenge in their respective places.

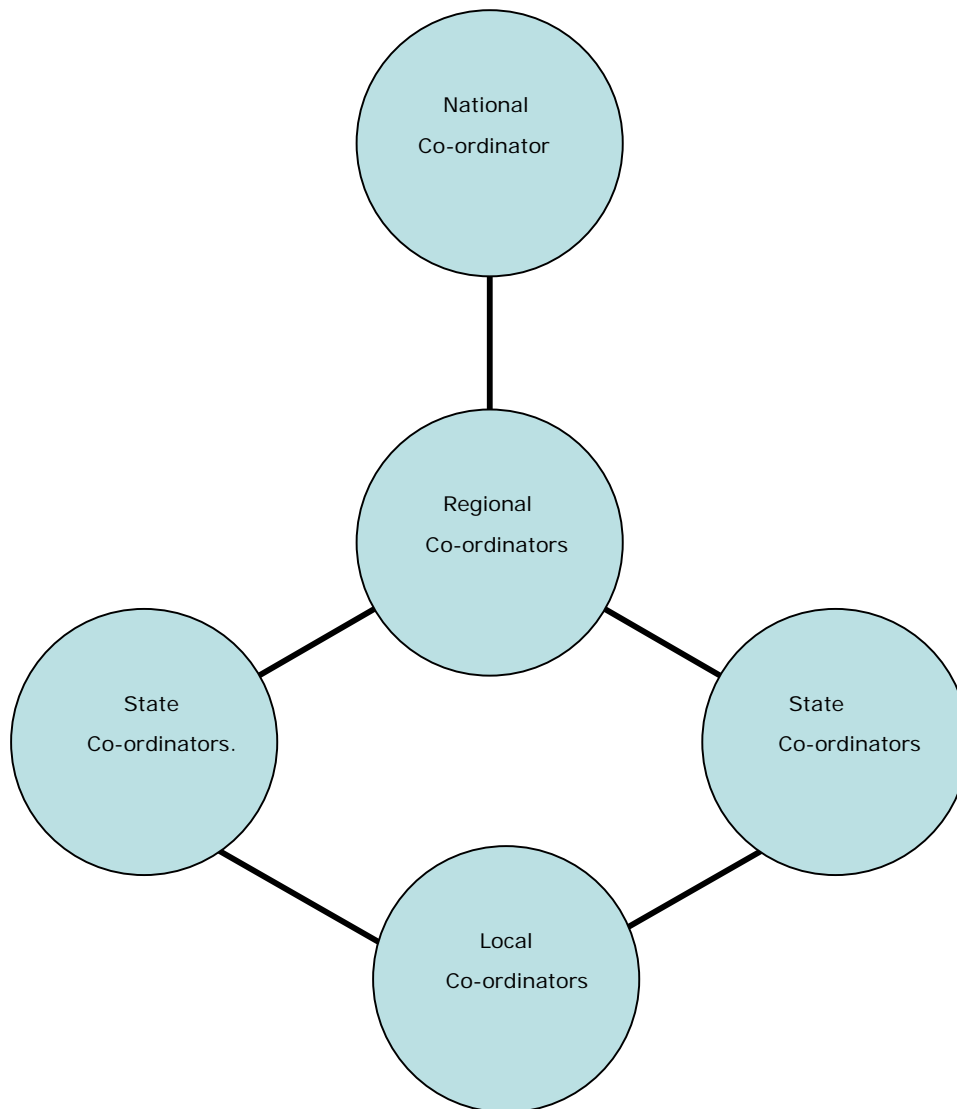

With this vision, structure and **guidelines** endorsed organizations, institutions, companies, students etc, will be able to walk in light of this model in their respective places.

Vision: Nigeria and Africa is able to achieve the United Nations Millennium Development Goals by 2015.

Structure: The National representative or coordinators of this initiative will oversee the Regional co-ordinators (six political zones in Nigeria), regional co-ordinators will oversee the State and State co-ordinator oversees the Local co-ordinators walking with implementation plan principles.

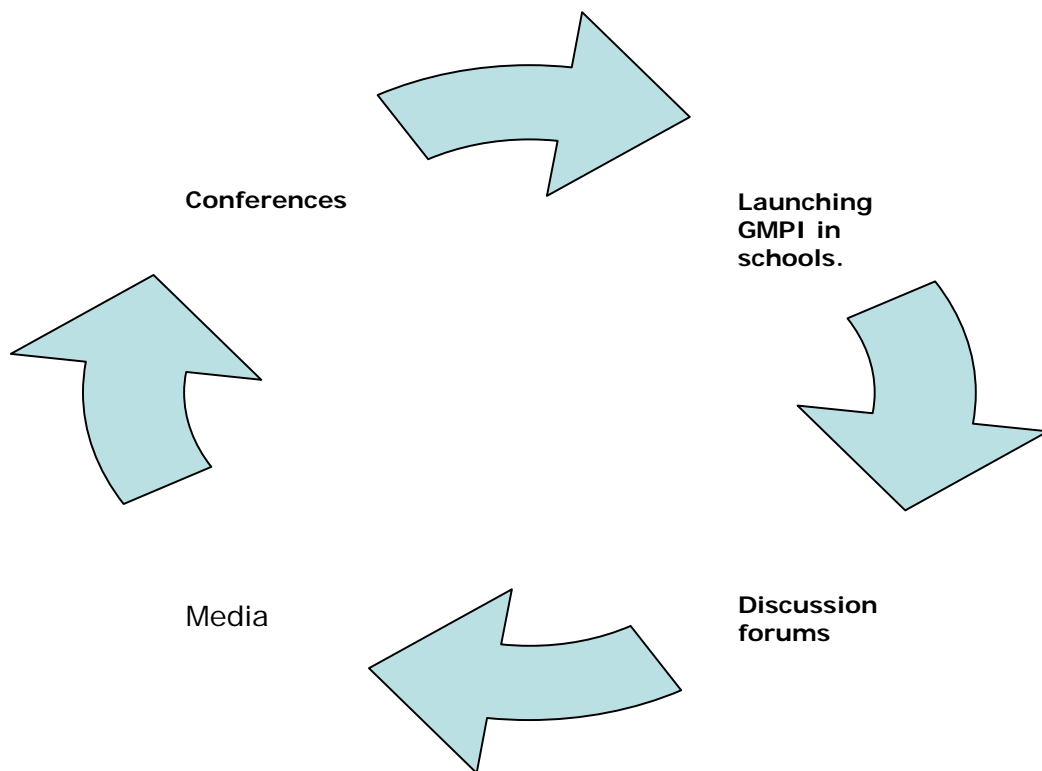

Structure Model for the Implementation GMPI in Nigeria Chat.

Guidelines: Guidelines or strategies of implementation GMPI in Nigeria

- Launching Global Marshall Plan in schools
- Discussion forums
- Conferences.
- Media

Guidelines of the Implementation GMPI in Nigeria Chat.

Guidelines of implementation GMPI in Nigeria

- Launching Global Marshall Plan in schools
- Discussion forum
- Conferences.
- Media

Please see addition chat of Global Marshall Plan - strategy, structure (draft) matrix in Nigeria (appendix 1: second attached file our email).

1. Launching Global Marshall Plan in schools:

From the chat we see that L4A and as well other Ngos in their respective locality will reach the secondary schools and form GMPI group and set up co-ordinators (final year students) and on graduation they are available for volunteers until their admission into the universities.

Graduated students (Volunteers) reach the lower schools (primary schools) as volunteer workers with together with L4A members and other NGOs.

On admission to the universities they set up GMPI Nigeria group or join existing strategic is very vital because our teenagers are the key focus in country's economy if their mind can be transformed into community service before their youth or adulthood they are already walking in light with mandate of the initiative and other Global sustainable development initiatives.

We are empowering NGOs with this philosophy, which literally means to define parameters in which they will operate and then setting them free to create programs in line with vision of GMPI.

Example of Model of programs.

- GMPI campaigns: address students during their assembly sessions of the initiative and create opportunities for volunteer programs.

- Organizing essay completion (topics relating to challenges in the environment local, and international etc – successful students get proposed prizes etc.

Letters can be sent to research organizations and in return they act as sponsors.

- Sporting events
- HIV/AIDS campaigns
- GMPI newsletter or magazine as they grow, which is a powerful medium to reach their seniors, peers, and their subordinate peers.
- Exchange programs among schools – setting up discussion with head girls/boys to integrate ideals and initiatives.

The other vital point is that the students will reach their parents and the parents also will reach their peers or colleagues as the chat describes.

Launching of GMPI in secondary schools will begin after resumption on 14th April 2008. From our structure we will visit 9 schools in 12 months, by 2015 63 secondary schools has on to knowledge of global Marshall Plan and running GMPI groups. Figure other NGOs walking in light of this structure.

2. Discussion forums:

Discussion forums: From observation most times people communicate effectively on their own level. Is easy for a student to talk or persuade another student, or is easier for a medical doctor to discuss with his colleagues and convince him as regards a goal than a shoe maker.

Discussion forum will be held among related fields. One the ways is organizing meeting in commission or companies etc and relate the vision to them and as it relates to your company or establishment.

This can be during break sessions or approval time by leadership for a specific date. Liberty 4 Africa company and charity sustainable energy project will use network of investors to persuade the private sectors into endorsement of Global Marshall Plan Initiative in Nigeria and beyond.

This project is already attracting local and international investors. We are making arrangement to discussion with the Federal Government of Nigeria next week (3rd April 2008) and other UN foundations. It is our psychological disposition that respective endorsers will create sustainable programs inline with the vision and spread the goals of **GMPI**.

3. Conferences. - Summit on the implementation of Global Marshall Plan Initiative in Nigeria 2008.

Conference is the key that opens and the same time propels the respective ideals, initiatives been discussed previously in forums, schools, churches, governments and also the international communities and this conference will be held annually.

Conference with includes varieties of personalities. Guest speakers will address key notes and invited audience include; Presidency, State Governments, Inter-governmental Agencies, Local governments, High Commissioners and Embassy representatives, professional's, academics, our sponsors, local, national & international NGOs, CBOs representatives, Youth Leaders, representatives from Private and Public sector industries, entrepreneurs and all stakeholders.

From our advisory board the conference for this year will be held in Friday 28th – Saturday 29th November 2008.

Venue: Petroleum Training Institute (PTI) Conference Hall, Effurun Delta State, Nigeria.

GMPI reception – 6.00pm- 7.00pm Saturday 26th April 2008.

Evening reception of the Summit on the implementation of Global Marshall Plan Initiative at Petroleum Training Institute (PTI) Conference Hall, Effurun Delta State, Nigeria.

Day 3: Thanksgiving Service – 8.30am – 10.30am Sunday 30th April 2008.

A thanksgiving service at the Living Faith Church, Warri – Delta State a.k.a Winners Chapel.

Media: This is the fuel in the structural implementation plan, already the press body in Delta State Nigeria agrees to the philosophy of Global Marshall Plan Initiative and in our last meeting in the month of February 2008.

We were advised to hold regular press conferences at their various press centers in the country and they will make publications – this will sensitize the public as regards the aims and objectives of the initiatives. However, this medium is quite expensive, but pressmen can be persuaded with related partner organizations and companies.

S.M.S: The use of mobile text systems is what I call **Sensitize Marshall Sentences** in less than a minute. We can reach and touch the heart of millions of Nigerians through this medium and create opportunities for them to endorse GMPI or maximize grace to work for the initiative.

Internet: build community website pages, endorsers can link to GMPI international website. But it will be very effective to have various communities' sites in each country by national representatives or coordinators. We are working on ours presently and we send for approval to the Global Marshall Plan International Co-ordinating office in Germany.

It is also imperative to know that the site will be closely observed by GMPI to ensure that the vision of the initiative is always in right order. The site will have a platform where students, individuals, organizations etc. can share ideas, experiences, challenges, and transition in their own local or culture mode and this will help propel the initiative forward.

Newsletter: the already existing Global Marshall Plan Initiative newsletters has been doing a great job; which is a very powerful tool and we encourage other endorsers to forward emails of supporters to Global Marshall Plan Initiative to keep the supporters updated.

Session 2

Call to endorsed Global Marshall Plan Initiative for a Worldwide Eco-social Market Economy in Nigeria and Africa

Liberty 4 Africa is the National Representative of Global Marshall Plan Initiative for a Worldwide Eco-social Market Economy in Nigeria and Africa (www.globalmarshallplan.org)

With her present statues she has a network of NGOs, Civil societies working in partnership with this initiative that takes the concepts of the UN MDGs; so other partners NGOs are called to endorsed this initiative to see that we achieve this initiative in the country and as well as Africa.

We are filling the Global Marshall Plan - strategy, structure (draft) matrix in Nigeria and we encourage you to carefully study this implementation model of the initiative in Nigeria and as well as the international website of GMPI www.globalmarshallplan.org

To endorse this initiative and be the head of families in your respective fields please request for Global Marshall Plan - strategy, structure (draft) matrix in Nigeria and endorsement form and also your organizational brochure.

Send your information to liberty4africa@yahoo.com

For students L4A and her NGOs partners are also bring the e-learning platform to equip the workforce with 21st century employability skills. So that it is ready to compete with the global economy, attracting corporate investment into the local economy by cultivating a well-trained workforce base from which multi-national and local companies can hire employees.

These courses (over 500 IT and professional development) will be given free to end-users after been sponsored by organizations or donors.

New National representative Secretariat:

Liberty 4 Africa is trilled to have received an assurance from our Delta State Government and possible in form of infrastructure and our board has approved and we create floor for Global Marshall Plan Initiative in Nigeria in our Vocational Training and Sustainable Development Center.

Benefits to the Youth and Society

- Universal access to high-end skills & 21st. century employability and self-sustaining training courseware.
- More productive and efficient societies through better-trained work force and embedment of the culture of continuous self-improvement via lifelong learning/education.
- Help to curb the youth restiveness we have in the country, especially in the Niger-Delta Region.
- Help to curb the youth involvement in Internet fraud and other corruption practices in the country, especially in the Lagos and other parts of the country.
- Sustain and strengthen the entrepreneurship development in the country and as well as sustaining the country economy, especially at the local communities.
- Curb the rate of unemployment by providing well-trained individuals, with better opportunities in getting local, international jobs.
- Saves Time: courses can be access anytime, anywhere, classroom training traditionally takes much more.
- Saves Money: courses can be launched via internet or download using e-skills 360 cards.
- Risk free Environment: learning with the ability to try new things and learn from mistakes.
- Individual minds are transformed from the mentality that Oil or other multinationals companies and Government must give them money to be able to have a quality living. (Rather money is literally secondary and man's mind, his skills and potentials are his primary capital).
- Help to curb the high rate of human trafficking in the country, to other African nations and to the overseas nations, (Individuals have the opportunity to be well skilled and have the opportunity to apply for a foreign job and achieve his or her overseas dreams in a legitimate way).

Special benefits:

- ✓ Liberty 4 Africa will use her international contacts and also her relationship with multinationals companies to refer end-user to useful employment opportunity.

- ✓ Liberty 4 Africa will teach empowered youths on how to own and run their Micro Aglae farm for **FREE**.
- ✓ Liberty 4 Africa and her international partners will recruit empowered youths for our sustainable energy development project.
- ✓ Liberty 4 Africa and AfricanGreenFuture Germany and other international partners will partnership with empowered youths who focus on entrepreneurship development in our sustainable energy project.
- ✓ On passage of minimum of 10 courses Youths has the opportunity to owning their personal brand new laptop for **FREE in our LCC promo**.

Belief Summary of Sustainable Energy Project.

Our Speciality.

Human and animal sewage conversation with micro algae to produce Bio-Briquettes as a substitution for wood or for no fuels, the production itself can give people sustainable work and income where is no other solution.

Our priorities.

Food for people, Energy for Europe and Africa with both: income for Africa and future for both and beyond.

Micro algae farming is a wonderful solution for countries (like Nigeria) with deserts or desert areas and any water connection (we can work with seawater and freshwater; Niger-Delta Region) – to produce biomass for:

- 1 Bioenergy like Biodiesel, Biogas, Biofuel, and later hydrogen for sustainable development.
- 2 Other biomass besides fuel: Building materials and Biodegradable plastics and paper (using cellulose fibres).
- 3 Health, pharmacy and cosmetic products for people.
- 4 Food and nutrition especially some micro algae power food against malnutrition like Spirulina and Chlorella. (Please see Mike Adams text from <http://www.chlorellafactor.com/> attached and the website <http://www.spirulinasource.com/> (Please look the videos on fighting malnutrition there) also for AIDS and Cancer there were made a lot of researches with good results.
- 5 Food for fish (farming and aquaculture because many people in the

ocean {Niger-Delta Region}, cannot catch fish anymore because ocean becomes empty with dramatic speed.
