

Looking back from 2010 at two years of consultation which has truly become a movement: A large number of regional experts and leaders workshops have already been conducted, the results of the interviews on value systems have become a well recommended source of information for decision makers in politics and society. The platform www.global-commons.net creates a lot of traffic and is an accepted platform for you and me participants from all over the world. The global-commons layer on Google Earth is steadily growing.
